

Standard Life Global Index Funds

Key benefits

The Standard Life Global Index Funds give a choice of five simple, ready-made, multi-asset portfolios. The underlying investments are managed by Vanguard, one of the worlds' largest fund managers. The five ready-made portfolios offer different combinations of equities and bonds and are continuously rebalanced to ensure the asset mix remains constant over time.

Diversification
Each fund invests in Vanguard's index funds, giving you access to thousands of international stocks and bonds, across all major global regions and industries.

Investment mix
Each fund is managed to maintain its specific asset allocation, rebalanced to make sure they don't drift out of line from their target mix of equities and bonds. This means you can rest assured that the mix between equities and bonds will be consistent in the future.

Simple and easy to understand
Each fund only invests in a combination of equities and bonds, so no complex investment instruments to consider.

Low cost
Using Vanguard's low-cost index funds as building blocks means that the funds deliver a diversified all-in-one portfolio at a relatively low cost. Each of the five funds have an annual management charge of 0.95%.

Easy access
These funds are priced daily. If your circumstances change, it's easy to switch between the five Global Index Funds or any of Standard Life's funds that are available under your product.

Performance
Each fund consists of a number of index-tracking funds managed by Vanguard, a leader in index fund management since 1976. They have a strong reputation for generating investment returns in line with each index that they track. This provides you with the peace of mind that you'll typically receive investment returns in line with the market, gross of fees.

* The Standard Life Global Index Fund Funds launched on 17 August 2021. To show the historic performance of similar portfolios prior to 17 August 2021, we use the past performance of the three underlying funds in which Global Index Funds invest. The historic portfolios are comprised of the underlying Vanguard Global Stock Index Institutional EUR (ISIN IE00B03HD191), the Vanguard Emerging Markets Stock Index Institutional EUR (ISIN IE0031786696) and the Vanguard Global Bond Index Institutional Plus Hedged Acc EUR (ISIN IE00BGCZ0B53), where relevant. The performance track history assumes the respective fixed allocations to Global Equities and Global Bonds, where relevant. The past performance of each portfolio is reflective of asset allocation rebalancing monthly. Please note that the Standard Life Global Index Funds are rebalanced on an ongoing basis. The annual management charge (AMC) of these underlying funds is different to the AMC of the Standard Life Global Index Funds.
